this book brings together about 2 500 quotations on various topics of interest to  
scientists and engineers including students of stem disciplines careful curation of  
the material by the editor provides the reader with far greater value than can be  
obtained by searching the internet the quotes have been selected for various  
attributes including importance of topic depth of insight and not least wit with many  
of them satisfying all these criteria to make sequential reading of the quotes more  
engaging they are grouped into broad topical sections and the entries within each  
section are organized thematically forming quasi continuous narrative threads the  
text and authorship of each quote have been carefully verified and the most popular  
cases of misquotation and misattribution are noted the book represents a valuable  
resource for those writing science and engineering articles as well as being a joy to  
read in its own right

information and the professional scientist and engineer examines how electronic  
resources have affected the ways engineers and scientists seek use and  
communicate information vital to their research and development needs  
information specialists working in academic corporate government and  
organization libraries discuss the changes in user behavior as academics in science  
and engineering fields rely more and more on the internet and online journals the  
book provides unique insight into the specific educational needs of college and  
university students as librarians and department faculty determine appropriate  
instruction for science and engineering classes

the american public government and the news media continually grapple with  
myriad policy issues related to science and technology those issues include global

warming energy stem cell research health care childhood autism food safety and genetics to name but a few when the public is informed on such topics chances improve for reasoned policy decisions journalists have typically bridged the gap between scientists and the public but the times now call for more engagement from the experts the authors in this collection write convincingly about why scientists and engineers should shake off their ivory tower reticence and take science to the people taking science to the people calls on scientists and engineers to polish their writing and speaking skills in order to communicate more clearly about their work to the public policy makers and reporters who cover science the authors represent a range of experience and authority including distinguished scientists who write well about science federal officials who communicate to congress about science and science journalists who weigh in with their own expertise in this long overdue volume scientists engineers and journalists will find both a convincing rationale for communicating well about science and many practical methods for doing so
